

1. **Title of the Practice:** LinkedIn (Faculty and Students) Scribble Series.
2. **Objectives of the Practice:** The Faculty and Student Scribble Series on SSE's LinkedIn Page was started as a monthly activity from June 2021.
 - The main objective of this practice is to encourage both faculty members and students, to write small articles on current affairs and issues, and share the intellectual inputs with one another on this social media platform.
 - A wide range of topics have been uploaded on the page which includes gender equality, crypto-currencies, municipal audits, environment, climate change, etc.
 - As of May 2022, 9 faculty and 3 students articles have been uploaded on SSE's LinkedIn Page.
3. **The Context:** The "Scribble Series" in LinkedIn was initiated in June 2021. It includes uploading one article based on current affairs, one each for student and faculty on a monthly basis. Every faculty member was encouraged to upload their article/ write-up.
4. **The Practice:**
 - The "Scribble Series" acts as a forum for the intermingling of ideas.
 - It provides a platform for both students and faculty members to express their thoughts on current issues in India and the world. Being at the School of Economics, it is important to have knowledge and opinions about current scenarios in the world and this best practice helps in providing exactly that.
5. **Evidence of Success:** Good response in this regard was seen by both faculty and students.
6. **Problems Encountered and Resources Required:** One of the difficulties faced while undertaking this activity was the need to ensure the regular and timely flow of scribbles from both faculty and students.

HOW THE RUSSIA-UKRAINE CONFLICT WILL AFFECT GLOBAL ECONOMIES

While the world is still reeling from the economic aftermath of the pandemic, on 24 February 2022 Russia attacked Ukraine. Overnight the EU and US imposed sanctions of varying degrees on Russia. These sanctions include barring government and banks out of global financial markets, limiting technology exports and freezing assets of powerful Russians. Many multinational firms have restricted and even completely retracted all kinds of business transactions with Russia. Global oil prices and food security have become a great point of concern. Much more than when we were grappling with the pandemic.

MAYBE, THE THING IS NOT THE THING

- Dr. Ashlesha Khedekar

The Great Resignation. A workers' revolution! Or is it?

Just in case you have been living under a rock for the last few months, you may be wondering why it's a "thing". Enlighten yourself: Workers across the globe are quitting their jobs in larger numbers than "ever before". But why sensei?

Economists, industry experts and journalists have been reporting the unprecedented number of exits and basing their analysis of this "disturbing trend" on a plethora of different factors. Popular opinion is that the pandemic is the leading culprit closely followed by the usual suspects of toxic work environment and new opportunities.

But wait. Can we really pin this one on COVID or toxic culture? Or are they just convenient and obvious reasons that fit the narrative of vested interests?

BLOCKCHAIN: DNA OF THE CRYPTOCURRENCIES

Ever-evolving electronic transmission of data and transactions of money over the internet is the way of the 21st century. Every day we come across new and improved features in those technology sets that make us believe that no idea that can be perceived is ever unachievable. Research and development on such features are tagged with their own set of benefits and costs created and mitigated by the advancing technology itself. The biggest challenge among others posed by this advancement in technology is in the area of "Trust", which is now falling prey to illegal activities, opaque transactions, and a larger gap in the informational symmetry among the public involving their money and privacy at large. The value
