Name	Subject taught	1. The University curriculum has prepared adequately for the scholars for their PhD journey and they must have received adequate knowledge for the same	2. The curriculum of the coursework is well designed and promotes learning experience and research experience for the scholars	3. The courses offered by the University have relevance to societal needs and PhD potential	4. The University encourages contributions from the faculty in curriculum and development	5. The courses offered by the University has adequate teaching hours for the particular course	6. Would you recommend any new course / topic to be added in the coursework? If "Yes" please mention below
Dr Shiba Parhi	Part of Econometrics Research	3	3	4	5	No	Yes. The course is on the econometrics as it has fundamental courses to understand econometrics, I feel we should add Mutivariate analysis, looking into the need those who are intersted in Finance and Economics , they should be taught this course with bit rich syllabus, all may not not be included only intersted students and committed students should join. Even all do not require econometrics, but multivariate analysis will be more useful. And multivariate will build foundation of different kinds of regression to deal with high end econometrics.
Anurag Asawa	Methodology and Qualitative research	5	5	5	5	Yes	No
	statistics and econometrics	4	4	4	3	Yes	No
Dr Roshan kazi	statistics and econometrics	5	5	5	5	Yes	Yes. Introduction to SPSS
	Statistics for Research (Weekend batch)	5	4	3	4	Yes	No
	Art & Science of Writing	5	4	3	4	Yes	No
Ashish Kulkarni	Econometrics	5	5	5	5	Yes	No

Abhay Machindra Kudale	Qualitative Research	3	4	4	4	No	Yes. We are teaching students of weekend batch and as they are early in their Ph.D. for most of them topic is evolving idea. That is why it's challenging for them to understand the immense potential of qualitative research approach. All the students require more hands-on-experience in qualitative research and there is a need to increase more practical hours in the qualitative research course. This will enable us to teach them qualitative data approach, collection, data management and analysis by using state-of-the art software, as well.
